

City of Kigali

District Incentive Fund Highlights

- Strengthening city's capacity to plan and coordinate health activities throughout Kigali and its three districts; health forum brought together partners, stakeholders and district health technicians managing health projects and activities
- Family planning mobilization and outreach, including media campaign and training
- Capacity-building in prevention of and response to gender-based violence, workshop with community leaders and local authorities
- Capacity building in planning processes for the 2009-2012 planning and budget cycle; production of Medium-Term Expenditure Framework and *imihigo*

Family Planning in Kigali

As part of an effort to promote family planning, Twubakane worked with Kigali City to support orientations in family planning to district mayors and other local authorities. Mayors were introduced to the various FP methods and how they work as well as to where services could be accessed. More than 75 health care providers in Kigali have been trained in the full range of modern contraceptive services. The contraceptive prevalence rate for modern methods in Kigali increased from 23% in 2005 to 35% in 2007-08 (DHS) and quarterly couple years of protection has increased nearly six-fold.

Gender-Based Violence Prevention and Response

In collaboration with the MINISANTE, Twubakane trained five district hospital trainers in Kigali on gender-based violence prevention and case management, who then provided training, capacity building, and supervision to 46 health providers to respond to GBV.
