- Income-generating activities for PAQ teams
- Purchase and supply of medical equipment for Munini Hospital.

Munini Hospital Improves Access to Care

Before

After

Until 2008, Nyaruguru did not have a hospital to serve its population. With its DIF grants, the district renovated building—and created a state-of-the-art hospital.

“ We will never forget how mothers and babies were dying on their way to other district hospitals, travelling many kilometers to get delivery services. Munini Hospital is the pride of our district; it dramatically reduced maternal and newborn deaths among other things... This is a tremendous milestone that we achieved through our partnership with the Twubakane Program. ”

– Nyaruguru District mayor Felix Sibomana.

Community health workers around Kabirzi Health Center demonstrate the use of SUR'EAU, a water purification product important for the prevention of diarrheal disease.
